GEMSTONE

12th ANNUAL HEREFORD & ANGUS BULL AND BRED FEMALE SALE

41 ANGUS BULLS • 19 HEREFORD BULLS • 9 F1 BULLS • 80 BRED HEIFERS

Our family(s) would like to welcome you to the 12th Annual Gemstone Bull and Female Sale!

We are excited about the lineup of cattle on offer this year and I believe it is one of the strongest set of bulls we have put together to date. We continue to push our bulls to thrive under low input ranch conditions. The bulls ran out with their mothers last year till mid December when they were weaned. They spent the winter on a forage only, poly crop silage blend and then went back out to grass the end of May. The bulls will remain out grazing as long as possible before the sale and then be fed free choice hay on a quarter section field for the winter.

Our philosophy has not changed over the years. Our cows must work for us and thrive in a low input environment. Chasing fads and EPDs has never been our priority as that just tends to produce big, inefficient cattle that need more added inputs to stay in the herd. Our focus is on cattle that have proven themselves under our ranch conditions; coming from sound bloodlines that are long lived, have good feet and sound functional udders.

The mothers of these bulls thrive under similar conditions, grazing stockpiled native grass as long as possible into the year. Last winter the cows were only fed for 30 days in March.
A new sire to our program, Calvo Forager 57E, has added a lot of thickness and capacity to his offspring while maintaining a moderate frame. When we ultra-sounded the bulls in October his sons were well above average for Lean Meat Yield and above average ribeye area in the group.

We once again have a fancy set of F1 heifers from our commercial herd. The top end has been selected and bred for this sale. As calves, these heifers were out grazing with their mothers until the end of March when they were weaned and then sent back to grass in mid May.

Lazy J Ranch and Ribbon Creek Ranch will each be bringing a fancy package of heifers again. These heifers are all bred to Gemstone Bulls.

Have a look at the Heifer section of the catalog for more details about breeding dates.

We invite anyone interested to stop by ahead of the sale and assess the cattle at home. We would love the opportunity to show you their mothers who will be out grazing with their 2026 calves.

Join us for lunch at 11:30 sale day, hope to see you there!

- Daniel & Kimberly for the Doerksen Family

The cattle are available to be viewed at our place prior to sale day. If you would like more information on the cattle please call any time.

GEMSTONE CATTLE COMPANY

12th Annual Hereford & Angus Bull & Bred Female Sale
Wednesday, December 2nd, 2026 • 1 PM • Brooks, Alberta
Bow Slope Shipping Association
WE INVITE YOU TO COME EARLY FOR LUNCH!

Gemstone Goals

The goal of our breeding program has long been to produce efficient, productive brood cows – deep ribbed cattle that are naturally easy fleshing, structurally correct and have superior udder quality. In our experience the cows that thrive on pasture and consistently wean a high percentage of their body weight, produce the cattle that are most efficient through the rest of the beef production cycle.

The strength of a bull's pedigree is really in the number of long-lived productive cows that show up in his pedigree and even stronger if the best cows appear multiple times. We take advantage of linebreeding in our cow herd to increase consistency and prepotency of the resulting offspring. The 140W Hereford cow (mother of 14G) has 20 cows in her extended pedigree that produced to 9 years of age and 5 of them show up more than once. Our belief is that *"when you get the cow right, everything else will fall into place"*. All of our Hereford cows were born here and most are daughters and granddaughters of F-R 8020 Lad 33H. In the Red Angus herd we've used some of the best bulls we could from programs that have similar priorities as ours.

We've used several bulls from Calvo Family Red Angus in Nebraska – two whose dams are Roy Beeby bred cows and another one straight Beckton breeding. Our 19F bull was bred at Edie Creek Angus in Manitoba and one of the best footed Red Angus bulls we've seen.

BULL DEVELOPMENT

We take bull development very seriously and it is something that will impact how a bull will perform for the rest of his life.

Our bulls are never pushed to gain weight on a high energy diet. The calves are weaned onto high roughage feed their first winter and turned out on pasture in the spring to develop as bulls. They will stay out on pasture until sale time and be supplemented with dry hay. They will come to the sale in early December never having been fed grain so you'll see them in their natural condition –

THICKNESS BRED IN NOT FED IN!

EPD'S USED IN CATALOGUE:

CE: Calving Ease EPDs are calculated using birth weight and calving ease score information. Calving ease EPDs represent the ease with which progeny of an animal are born to first calf heifers. The EPD is expressed as a percent probability, with a higher value representing calves with a higher probability of being born unassisted.

BW: Birth weight is an indicator of calving ease. Higher birthweight EPDs usually indicate more calving difficulty.

WW: The weaning EPD reflects progeny growth differences up to 205 days of age.

YW: The yearling EPD reflects progeny growth differences through to 365 days of age.

MM: The milk EPD indicates the ability of a sire's daughters to provide their calves with an environment that encourages growth from birth to weaning, through mothering ability and milk production. This EPD is expressed in the expected difference in pounds of calf at weaning.

TM: Also known as Milk + Growth, this EPD combines the milk EPD plus 1/2 the weaning weight EPD. It is expressed in pounds of calf weaned at 205 days and combines the genetics for pre-weaning growth and the influence of the maternal environment on the weaning weight of the daughter's progeny.

TERMS & CONDITIONS

- All sales shall be final and binding. Any dispute shall be settled by the auctioneer at or before time of sale.
- Payment of livestock sold during the sale shall be paid in full, in Canadian funds to Bow Slope Shipping Association, unless prior arrangements have been made. (US exchange rate will be announced at the start of the sale)
- Any errors found in the catalogue will be corrected sale day by the auctioneer and will take precedence over the catalogue.
- Transfers will be done at the request of the buyer.
- Transfer and registration papers will be paid by the seller, and that no costs of the same be incurred by the purchaser.
- Consignors will not be liable for more than the purchase price of the bull.
- We will take the bulls back to our place until late March when we will start to deliver the bulls.
- If the buyer chooses to take their bulls home after the sale they will be credited $300 off the purchase price of their bull.
- Accidents: although every precaution will be taken to protect the safety and comfort of the buyers and public, neither the sales management, auctioneer, association or sellers assume any responsibility in this matter and disclaims any liability, legal or otherwise in the event of damage or loss of property, or injury.

BULL COVERAGE

For bulls that come back to our place to be wintered we are offering an alternative to standard insurance coverage. For bulls that are coming back to our place to be wintered, at the buyers option, for an additional 5% on the purchase price we will cover the bull for any potential injury, sickness or death from sale time to delivery in spring of 2027. This coverage will be full refund of the sale price or replacement of the bull with a bull of similar value, again at the buyers choice.

Should you wish to insure your bull for the upcoming breeding season upon delivery, Gemstone Cattle will assist in getting that accomplished through Canadian Farm Insurance Corp after the bulls have been semen tested and are ready for delivery.

Standard insurance coverage will also be an option on sale day through Canadian Farm Insurance Corp.

Bulls that return to Gemstone without coverage do so at the buyers risk.

ANGUS REFERENCE SIRES

sire A

RED GEMSTONE 67C LAD 45H

TATTOO: KGA 45H • DOB: APRIL 22 2020

EPD'S

CE	13.0
BW	-3.4
WW	17
YW	30
MILK	18

45H is a home raised bull out of our Calvo 67C bull and a great little Red cow we purchased from Diamond D Angus. 45H sons should moderate the frame size of his daughters and add a lot of thickness and tidy udders. 45H has a great disposition and his calves are some of the favourites to look at.

sire C

RED HODG 105Z LIAM 7280 91G

TATTOO: IMP 91G • DOB: MAY 7 2019

EPD'S

CE	3.0
BW	1.2
WW	22
YW	41
MILK	32

Sired by the old BB bred 7280 bull, 91G is a unique combination of BB, Red Hill and Beckton breeding in a sound, moderate, easy keeping package. He was bred by Bill Hodge and we were fortunate to get him as a 3 year old as the influence on the top side of his pedigree is mostly not available in Canada. By his progeny we are confident he will make a strong contribution to our grass-based breeding program. We think you'll like his calves.

sire B

RED CALVO FORAGER 57E

TATTOO: IMP 057E • DOB: MAY 2 2017 • RED

EPD'S

CE	6
BW	0.9
WW	46
YW	80
MILK	28

Forager is a bull we have wanted to use for a few years now and we were fortunate to finally get some semen up in Canada on him. Forager is moderate, has a ton of Rib shape and muscle and he passes those characteristics onto his calves. His sons and daughters are the thickest in the pen. If you want to add thickness and power into your calf crop while maintaining moderate frame size check out the Forager sons.

sire D

RED EDIE CREEK EASY RED 19F

TATTOO: ECA 19F • DOB: APRIL 22 2018 • RED

EPD'S

CE	9
BW	-1.5
WW	34
YW	65
MILK	25

19F came from the Edie Creek Angus 2020 sale. We were attracted to him because of the OCC bloodlines and his incredible feet. One of the best footed red bulls we have seen. He also holds his condition very well on grass and hay. He should produce cows that will excel in a low input program. We own 19F together with Edie Creek.

sire E

GLANWORTH WAIGROUP 1213

TATTOO: IMP 1213Z • DOB: AUGUST 27 2012 • BLACK

EPD'S

CE	7
BW	-1.2
WW	27
YW	48
MILK	16

We are excited about the 1213 calves. 1213 is a calving ease bull as well as a high marbling sire and we noticed that when we ultra-sounded the bulls. His sons were all well above average for marbling. He is also a documented udder improver passing down his optimal maternal traits to his daughters. We look forward to calving out his first daughters this spring.

F1 & HEREFORD REFERENCE SIRES

sire A

CUTBANK 4Z CORB LUND 1F

TATTOO: MICK 1F • DOB: MARCH 19 2018 • POLLED

EPD'S	
CE	1.6
BW	3.5
WW	55.7
YW	79.5
MILK	26.7
TM	54.6

We purchased Corb Lund from Lenard Poholka as a 6-year-old bull. He was raised and used by Mick Kubinic as a yearling. Corb is a complete outcross to any Canadian Hereford cattle. Corb Lund is going to add some length to his calf crop as well as a dark red hair coat with good pigment. He is an udder-improver with high butter fat. Corb Lund was still out breeding here this summer as an 8-year-old bull.

sire C

PRESTWOOD VICTOR 1225 F27

TATTOO: F27 • DOB: APRIL 25 2018 • POLLED

EPD'S	
CE	1
BW	3.6
WW	47.8
YW	76.4
MILK	10.8
TM	34.7

F27 is a deep, long bodied moderate bull. A line bred Trask bull that traces back to Teddy Gentry's BTF Grazer 5015 twice up close. As well he has two shots of Felton and some Victor on the top side. F27 is loaded up with renowned grass-based genetics that will convert grass to lbs. Cutbank Cattle Co brought F27 up from North Carolina and we purchased a ½ interest in him.

sire B

CUTBANK 9800D TRUE GRIT 6K

TATTOO: MICK 6K • DOB: DECEMBER 7 2022 • POLLED

EPD'S

MILK	20.6
TM	41.4

We purchased True Grit from Mick Kubinic. True Grit's mother has beautiful udder and exceptional feet. He is an Axel grandson and carries his style and thickness. True Grit's sire is still breeding cows at 10 years of age. We used True Grit on our angus heifers the first year and we are very happy with his F1 sons in the sale.

sire D

PCC OH AXEL 9516A

TATTOO: 9516A • DOB: SEPTEMBER 7 2013 • POLLED

EPD'S	
CE	-0.5

WW	53.7
YW	75.5
MILK	21.7
TM	48.6

Axel is a 3.5 frame score and weighs 2,170 lbs – developed on grass and hay only. His sons are thick, easy fleshing and have a great disposition. We really like the natural fleshing ability of his calves. His daughters are proving to be excellent cows. Owned with 98 Ranch

Q·select

a powerful selection tool for your herd

Select the traits you want in your herd

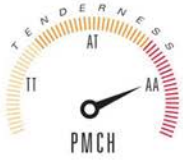
Q-select focuses on beef production traits that are economically important. Choose the traits that are important to you and identify which animals carry the essential genetics to promote those traits in your herd. Pair Q-select genotypes with other physical attributes to select the best bulls and replacement heifers.

Each genetic marker has undergone extensive peer reviewed research studies, and the economic traits that have been associated with each genetic marker have been proven through rigorous large scale testing.

Get The Performance You Want

A LEPTIN TT genotype animal has an increased rate of fat accumulation as compared to a LEPTIN CC animal.

OTHER BENEFITS include:
increased weaning weight
increased cow productive life
increased milk production
increased 12th rib backfat
impacts marbling & yield grade



A PMCH AA genotype animal has increased fat deposition compared to a PMCH TT animal.

OTHER BENEFITS include:
increased tenderness
increased marbling fat
increased 12th rib backfat

An IGF2 CC genotype animal has increased lean growth compared to an IGF2 TT animal.

OTHER BENEFITS include:
larger rib eye

A CRH GG genotype animal has increased weight compared to a CRH CC animal.

OTHER BENEFITS include:
increased hot carcass weight
increased rib eye area

Trait Heritability

Q-select is 100% heritable. Knowing the genotypes associated with desired traits means you can choose mating pairs to introduce desired genotypes into your herd and continue to pass on essential genetics.
